### Race Proceeds

Proceeds from the 2012 Bayshore Race will support the purchase of a new ultrasound machine for the Diagnostic Imaging Department at the Owen Sound Regional Hospital. Also known as sonography, ultrasound is a test that transmits high-frequency sound waves into the body. The echoes are recorded and transformed into video or still images of the internal structures of the body such as gall bladder, liver, heart, kidney, etc. - even of fetuses still in the womb.

The Hospital completes almost 12,500 ultrasound tests per year on patients from across Grey-Bruce. This non-invasive test is routinely used to detect liver and kidney problems, blood clots, tendon and ligament damage, appendicitis, gall and kidney stones, aneurysms and is used to perform prostate biopsies. Read more about this and other Foundation projects at the Foundation website: [oshfoundation.ca](http://oshfoundation.ca)
